Your Project Number

1300140

Name of project manager

MLabs Ltd.

Date project started

Jan 20, 2025

Date project completed

Dec 12, 2025

List of challenge KPIs and how the project addressed them

- Created a working platform for DAOs to use treasury funds in Cardano Governance.
- Expanded the pool of ADA that can be used in Cardano Governance.
- Support community engagement by participating in on-chain governance to participate in Cardano Governance collectively.

List of project KPIs and how the project addressed them

- Expanded the number of Agora proposal effects we offer, a KPI indicating how interoperable Agora treasuries are with external capabilities.

Key achievements (in particular around collaboration and engagement)

- DAOs as a DRep are live at <https://www.clarity.vote/>
- DAOs are registered as a DRep when they are launched initially.
- Created a new type of Agora Effect that allows the DAO to cast a vote as the DAO's DRep.
- Integrated creation of the new DAO DRep Cast Vote on Cardano Governance Action Agora Effect with Clarity's existing frontend and backend to collect and store metadata, and send relevant data to Agora smart contracts for proposal creation.
- Allow users to vote on the new DAO DRep Cast Vote on Cardano Governance Action Agora Effect and see their vote was counted, and the outcome of the vote.
- Cast the DRep vote automatically as a result of the Agora vote.

Impact - provide some measurable impact data - demonstrate here the positive impact and accomplishments of your project

- Tests were successful 3/3 times in executing on-chain effects.

- This opens up the door for another 7+ figures of TVL in Clarity DAOs to participate in on-chain Cardano governance.

Why is this project important? Describe in your own words why this project matters. In other words, why should the Community be excited by what you have achieved?

- This product demonstrably increases the amount of ADA that can be active in on-chain Cardano Governance. Large DAOs of the future will not need to sacrifice collective management of funds for broader Cardano governance participation, striking a balance between project-wide and Cardano-wide governance.
